

DEBI CRAIG, DURANGO

---

“Before my surgery, the pain was so bad I couldn’t sleep. I got horrible headaches and I couldn’t do the sewing craft projects I love to work on because I was unable look down for long periods. But since my procedure, I feel like I got my life back. I’m pretty much pain free now. As far as my hospital experience, everybody was remarkable-- they were very patient with me, very kind and sympathetic.”
